

Chimera™ Tactical 30mm Rings

Specifications:

• Construction:

- **Advanced Alloy** - lightweight body strength
- **Titanium** - lightweight recoil resistance.
- **Naval Brass** - non-galling base retention.

• Extreme Strength:

- **Rings body** - 83,000lbs/inch tensile strength.
- **Cross bolt** - 120,000lbs/inch tensile strength.

• Superior Scope Retention:

- **Cap screws: 8-32's** rather than industry standard 8-40's
 - 45% greater clamping area under each screw head.
- **12 cap screws** rather than 8 standard
 - 150% greater CRC (Cap Retention Characteristics) than normal tact. rings.
- **Each ring gives 3.75sq/in clamping area** - that's 7.5sq/in per set - the greatest scope retention capability in the industry.

• Extreme Tolerances:

- **Precision Boring Technology** holding perfect alignment - $\pm 0.002''$
- **Sold as serial numbered matched sets** for mil-std 1913 rails only.

• Perfect Reticle alignment:

- **Scope cannot twist** when torquing rings as caps are torqued only on one side after alignment has been set.
